

CHARGER  
COLLECTION

SPEED CHARGER

Long radius speed-freak stability and power.

Dimensions:	125/72/99
Rocker:	Speed Rocker
Sizes:	168, 175, 182
Radius:	18m @ 175
Construction:	Aspen/Paulownia Power Hybrid, Metal Laminate
Bindings:	K2/Marker MXCell 14 TCx D

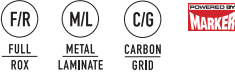

SUPER CHARGER

Medium radius, on-rails precision.

Dimensions:	126/76/105
Rocker:	Speed Rocker
Sizes:	161, 168, 175, 182
Radius:	17m @ 175
Construction:	Aspen/Paulownia Power Hybrid, Metal Laminate
Bindings:	K2/Marker MXCell 12 TCx D

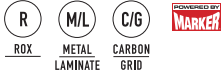

TURBO CHARGER

Short radius quickness for the turning technician.

Dimensions:	129/72/107
Rocker:	Speed Rocker
Sizes:	158, 165, 172
Radius:	13m @ 165
Construction:	Aspen/Paulownia Power Hybrid, Metal Laminate
Bindings:	K2/Marker MXC 12 TCx light Quikdik

CHARGER

New Construction. Precise and accurate feel delivers energy and confidence for ripping up groomers all day.

Dimensions:	126/76/105
Rocker:	Speed Rocker
Sizes:	161, 168, 175
Radius:	17m @ 175
Construction:	Fir/Aspen Power Hybrid
Bindings:	K2/Marker M3 11 TCx Quikdik

IKONIC 84Ti

The raw power of a super car refined to rip as a daily driver. **New Construction.**

Dimensions: 133/84/112  
Rocker: Speed Rocker  
Sizes: 163, 170, 177, 184  
Radius: 17.5m @ 177  
Construction: Aspen/Paulownia Konic, Metal Laminate

Bindings: K2/Marker  
MXCELL 12TCx Quikclick

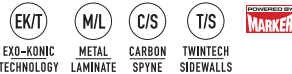

IKONIC 80Ti

Top-level precision that extends beyond morning corduroy.

Dimensions: 129/80/108  
Rocker: Speed Rocker  
Sizes: 156, 163, 170, 177, 184  
Radius: 17.5m @ 177  
Construction: Aspen/Paulownia Konic, Metal Laminate

Bindings: K2/Marker  
MXC 12TCx light Quikclick

KONIC  
COLLECTION

IKONIC 84

Lively and energetic feel that delivers next level performance all over the mountain.

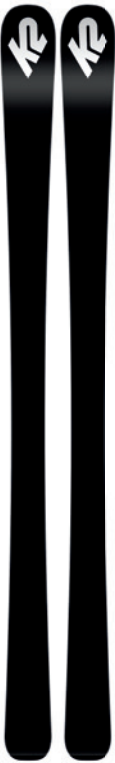

Dimensions: 133/84/112  
Rocker: Speed Rocker  
Sizes: 163, 170, 177, 184  
Radius: 17.5m @ 177  
Construction: Aspen/Paulownia Konic

Bindings: K2/Marker  
M3 12 TCx light Quikclik

IKONIC 80

Nimble and precise for carving on all slopes, all day.

Dimensions: 129/80/108  
Rocker: Speed Rocker  
Sizes: 163, 170, 177  
Radius: 16m @ 170  
Construction: Fir/Aspen Konic

Bindings: K2/Marker  
M3 10 Compact Quikclik light

KONIC 78

Quick and nimble combined with solid edge hold and confidence.

Dimensions: 119/78/108  
Rocker: Speed Rocker  
Sizes: 156, 163, 170, 177  
Radius: 15.5m @ 170  
Construction: Aspen Lite Konic

Bindings: K2/Marker  
M3 10 Compact Quikclik

KONIC 75

Quick and surefooted performance for exploring the whole mountain.

Dimensions: 115/75/106  
Rocker: Catch Free Rocker  
Sizes: 149, 156, 163, 170, 177  
Radius: 15m @ 170  
Construction: Konic

Bindings: K2/Marker  
M2 10 Quikclik

Saucer Boy's 'ski' of choice, the Fatty is built for the skier who is looking for the most unique and exciting path down the mountain.

Dimensions: 112/85/98  
Rocker: Fatty Rocker  
Sizes: 88  
Radius: Fast  
Construction: DuraCap

Bindings: Fatty

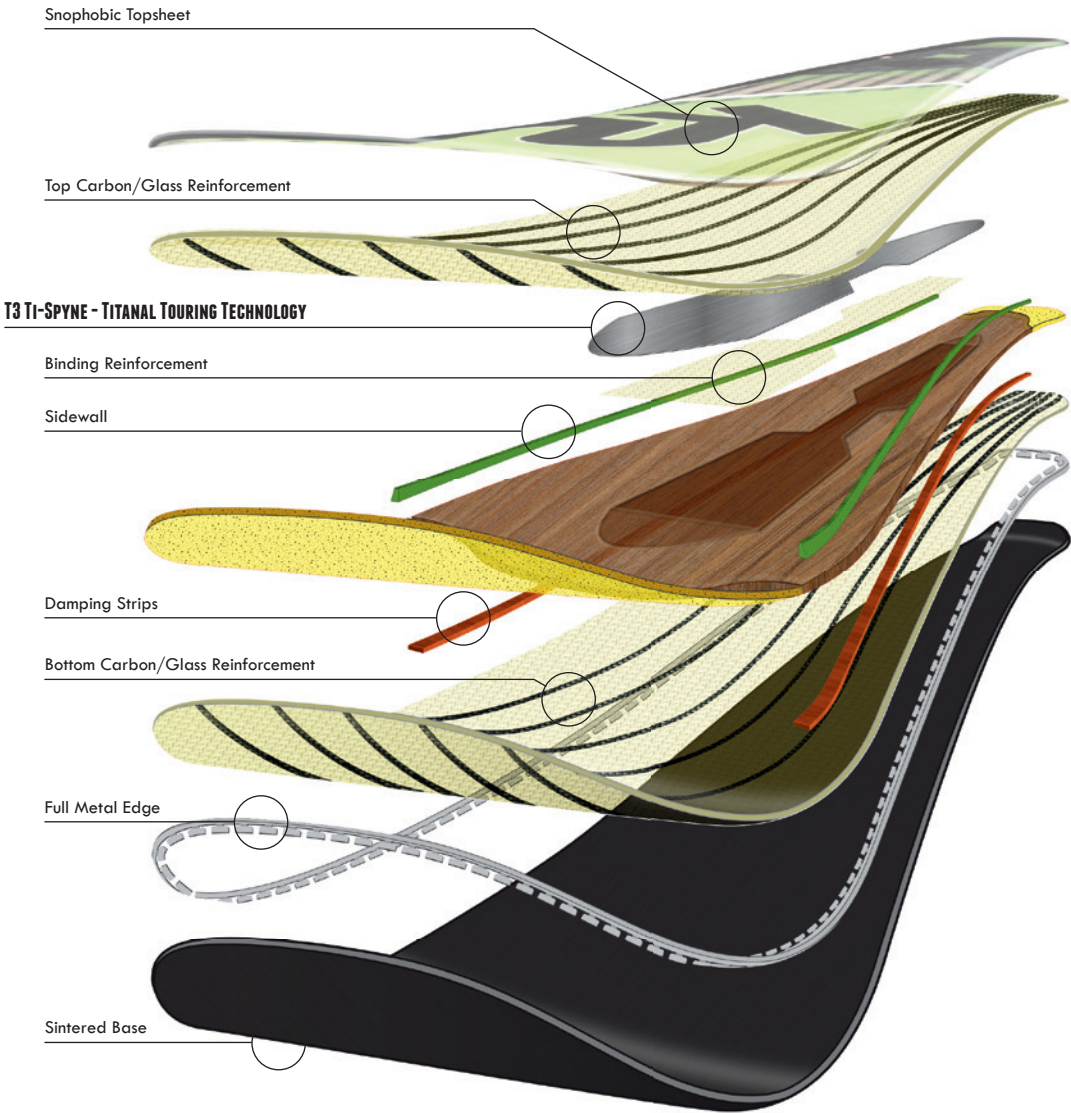

WAYBACK 88

# GUIDE INSPIRED

For over 20 years, K2 has been working with guides and athletes to build the best backcountry skis on the market. This year is no different. Our team of guides were tasked with testing and setting the stage for the Touring Series redesign. From North & South America to the Alps and Norway, these skis have seen it all.

This year's completely re-engineered Wayback line sets a new standard for backcountry skis; we've reduced ski weights significantly without sacrificing the downhill performance skiers expect from K2's touring skis. The new Waybacks aim to inspire you to reach further and seek out your 'best run ever' each and every day.

**UPHILL PERFORMANCE** - Wayback 80 - 967 grams @ 163cm  
**T3** - Titanal Touring Technology - Yes, we put Titanal in our touring skis.  
**BECAUSE DOWNHILL SKIING PERFORMANCE MATTERS.**

WAYBACK  
COLLECTION

**CELEBRATING  
20 YEARS!**

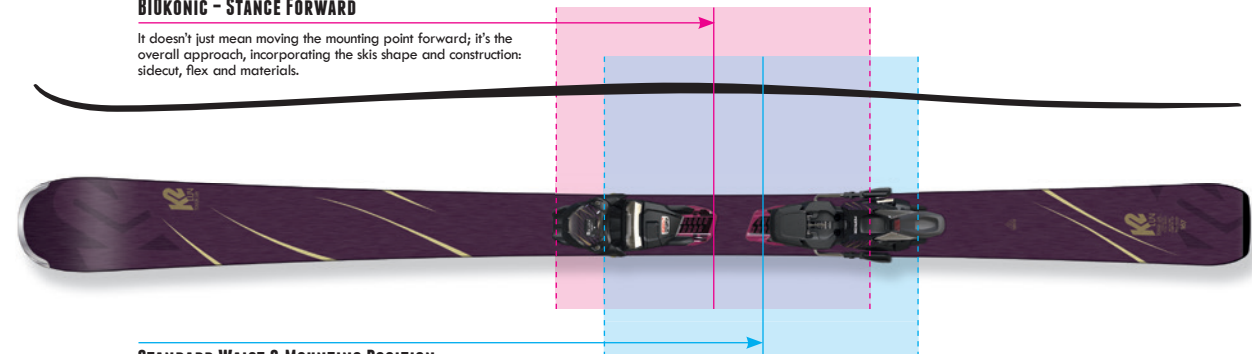

## DESIGN THAT BEGINS WITH WOMEN AND ENDS WITH LUV

The K2 Alliance has always been at the forefront of developing the most badass women's specific skis and we've done it again with our latest collection incorporating the all-new BIOkonic technology. The goal for the Alliance was to create a collection of skis designed from the ground up to specifically address the needs of female skiers of every level, type, and size; delivering the appropriate balance of performance attributes all while maintaining accessibility for a wide group of skiers.

### BIOKONIC - STANCE FORWARD

It doesn't just mean moving the mounting point forward; it's the overall approach, incorporating the skis shape and construction: sidecut, flex and materials.

STANDARD WAIST & MOUNTING POSITION

Our Alliance and R&D crew has taken a Women's First Design approach to the development of BIOkonic technology. The concept is simple, taking the BIOlogical approach to how women ski. It doesn't mean just taking a men's ski and moving the mounting point forward; it's a holistic approach to the overall design of the ski, matching the shape, flex profile and material distribution to the needs of female skiers. Moreover, BIOkonic technology allows us to optimize these attributes throughout all sizes of each model, ensuring that all women can benefit from BIOkonic.

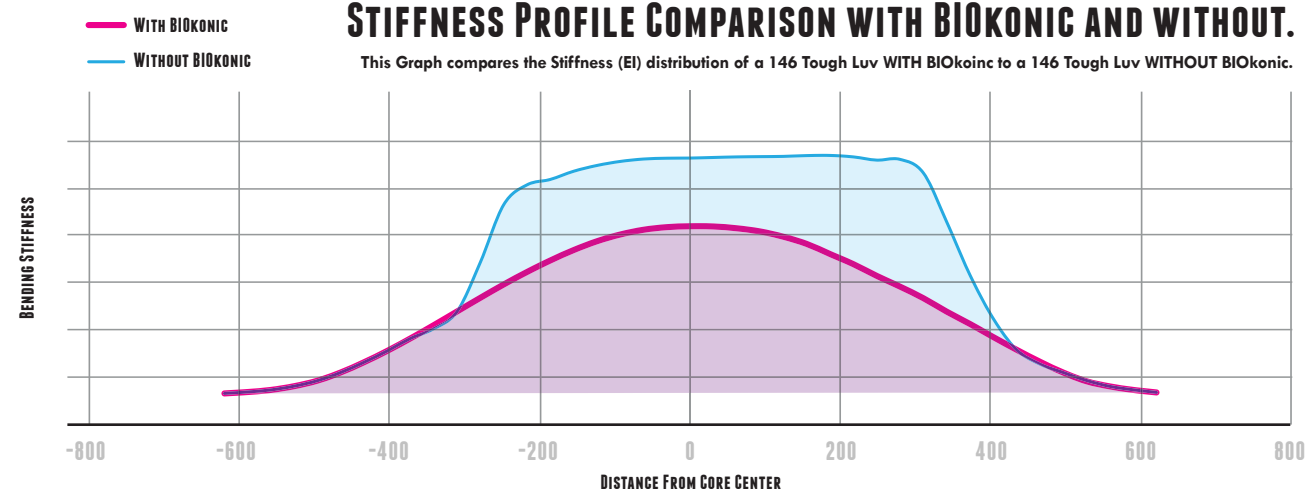

We are taking it back to basics and delivering on what women want; an energetic and consistent feel coupled with performance and precision to ensure the ultimate skiing experience.

Here's to the next twenty years!

**K2 Alliance & R&D Crew**

## STIFFNESS PROFILE COMPARISON WITH BIOKONIC AND WITHOUT.

This Graph compares the Stiffness (EI) distribution of a 146 Tough Luv WITH BIOkonic to a 146 Tough Luv WITHOUT BIOkonic.
