THUNDERBIRD

THUNDERBIRD

TECHNOLOGIES

PERFECT BALANCED FLEX

TRUEBLEND WOODCORE ON-PISTE

Two different types of wood specifically blended into one woodcore. The different density stringers are customized in quantity and length creating 3 different areas of density to precisely control the flex.

TRUEBLEND
WOODCORE

ACCESSIBLE PERFORMANCE

TRUEBLEND WOODCORE

The Trueblend Piste Woodcore is designed with a harder flex zone in the center, that provides stability and edge grip, a medium flex zone in front of and behind the binding that provides control, and a soft flex zone in the tip and tail that provides easy turn initiation and release. Trueblend technology allows us to precisely control the flex throughout the whole length of the ski and in every size.

TRUEBLEND TECHNOLOGY

ON-PISTE
11 × 3 BEECH-POPLAR

ALL MOUNTAIN
7 × 3 BEECH-POPLAR

PERFORMANCE EFFICIENCY

ACTIVE CARBON ARMOR

Active Carbon Armor is a vibration damping and rebound control system that is located under the binding. Inspired by the Carbon Armor from the Firebird collection, the carbon fiber plate is brought outside of the ski body which allows it to flex freely. In this way the ski turns out to be less demanding while still providing a very high level of performance.

INNOVATIVE AND VISIBLE TECHNOLOGY

Active Carbon Armor provides both vibration damping and enhanced rebound and acceleration without affecting the progressive flex of the ski.

DURABLE PROTECTION

DURAMAX

New titanal construction that is designed to provide both maximum durability and increased performance with a unique, high value look.

The top titanal layer is extended to the very edge of the ski and placed directly under the top foil which is then milled back 3 mm, thus exposing it. The titanal directly absorbs all impacts that occur along the top edge, reducing scratches and eliminating chipping.

DURAMAX

HIGH VALUE DETAILS

Great attention to details is what makes Thunderbird something special.

- Matt -shiny finish
- Storm icon plaquette
- Gunmetal finish
- Embossing

HIGH QUALITY AND VALUE

GREAT FINISHING

Trust is gained by consistently delivering a high level of quality. Through enhanced quality control procedures we aim to deliver the highest level of finishing, from running bases and edges to graphics and details.

TECNICA SKIBOOTS TECHNOLOGIES

THE MOST VERSATILE HIGH-PERFORMANCE SKIBOOT JUST BECAME STRONGER AND LIGHTER

NEW TECNICA COCHISE

T.RIDE

HIGH PERFORMANCE WALKING SYSTEM

The T-Ride system is fully integrated into the boot design. It's a solid cuff-to-shell connection which delivers the perfect combination between downhill performance and uphill hiking ability.

DRIVE PRECISION

The T-Ride longer lever arm guarantees a quicker edge to edge transition, increased lateral power and stability.

INTUITIVE SAFETY

The way the T-Ride is designed makes it easy and intuitive, you will always be sure whether is on ski or hiking mode.

The integrated lock system screw ensures that the mechanism stays closed even during hard cliff landings or impact with rocks.

The 50 degrees range of motion allows a comfortable hike up to the summit when in walk mode.

C.A.S. – PERFECT INDIVIDUAL FIT

THE C.A.S. FIT SYSTEM GIVES YOU THE ABILITY TO TRULY CUSTOMIZE YOUR SKIBOOT FOR AN ABSOLUTE PERSONAL FIT. THE ANATOMICAL SHAPE OF THE LINER AND SHELL ARE THE KEY TO A GREAT OUT-OF-THE-BOX FIT. THE CLOSER THE LINER AND SHELL MATCH THE NATURAL SHAPE OF THE FOOT, THE BETTER THE FIT AND PERFORMANCE WILL BE.

CAS

CUSTOM ADAPTIVE SHAPE

C.A.S. LINER

The Cochise C.A.S. liners are light, anatomically shaped for optimal comfort and great heel hold. The dual density micro-cells material is durable and easy to customize. For unmatched personal customization the C.A.S. liner can be thermo-molded, punched and grinded. The new folding structure on the back ensures easy hiking.

COCHISE 130 DYN GW

COCHISE 120 DYN GW
COCHISE 110 DYN GW

**CAS**

CUSTOM ADAPTIVE SHAPE

C.A.S SHELL

The C.A.S. shell has an anatomical shape that matches the foot shape. This allows for a better out-of-the-box fit. The dimples on the shell reduce surface tension and facilitate the thermo customization process, making boot fitters' life easier. The shell materials allow better and longer retainment of the customized shape.

**CAS**

CUSTOM ADAPTIVE SHAPE

C.A.S. TONGUE

A great addition to the C.A.S. customization system. The C.A.S. Tongue can be thermoformed in a few minutes to perfectly match the shape of your shin.

- 3D custom shape of the tongue
- Solves the problem of shin pain
- Increases the performance
- Easy to thermoform

TECHNICAL FEATURES

ARCH GRIP

Toe and heel Vibram® rubbered soles are connected by the rubber Arch Grip that delivers more versatility in the daily usage. It supplies more grip on mountain terrain, on metal ladders, on snowmobiles, and so on.

ASYMMETRIC POWER TRANSMISSION

The inside of the boot is made with thicker plastic to increase support where needed. This provides more lateral power transmission and increased edge grip.

FREE MOVE

The new hinge point allows frictionless hiking, so you can hike more with less energy.

QUICK INSTEP

The instep material is softer, making stepping in and out easy and avoiding unnecessary pain, especially at low temperatures.

POWER LOCK

The Power Lock strap provides perfect control and more precise power transmission. The hook eliminates the need to open the strap completely, saving you time.

PERFORMANCE EFFICIENCY

NEW TECNICA MACH1 LV

T.DRIVE

A TRUE GAME CHANGER
TECHNOLOGY TO
IMPROVE PERFORMANCE
AND COMFORT THANKS
TO A REVOLUTIONARY
NEW SHELL TO CUFF
CONNECTION.

TECHNICAL FEATURES

DRIVE PRECISION

The T-Drive dynamic carbon connector creates a longer lever arm compared to traditional ski boots. This allows:

- Quicker edge to edge transition
- Increased lateral power and stability
- Edge drive precision

PERFORMANCE EFFICIENCY

The T-Drive technology creates a stronger and more effective connection between the cuff and the shell, that delivers a more consistent flex and reduces plastic deformation. This means that the boots perform better with less effort. They do the work for you so you can ski longer and better.

10%

Faster than
the other boots

25%

Increasing of the
lateral power

20%

Increasing of the
edge stability

10%

Less material
deformation

FLEX

Different flex (more
progressive)

COMFORT

Bootfitting is
not affected

ENHANCED COMFORT

The T-Drive technology provides a constant flex regardless of temperatures, which reduces shell deformation and delivers a more consistent fit.

And since the support comes from the T-Drive, the material of the shell and cuff is softer.

As a result, the boots wrap better and are easier to get on and off, without compromising the performance.

LV

Low volume

MV

Mid volume

HV

High volume

VOLUME STORY

Best fit out-of-the-box. Precise anatomical shape results in an accurate fit that offers more comfort and better performance.

To guarantee the perfect fit matching every foot-shape the Mach1 series is offered in 3 different volumes:

- Low volume: 98 mm
- Mid volume: 100 mm
- High volume: 103 mm

CAS

CUSTOM ADAPTIVE SHAPE

C.A.S. LINER

The C.A.S. liners are anatomically shaped for optimal comfort and great heel hold.

The dual density micro-cells material is durable and easy to customize.

For unmatched personal customization the C.A.S. liner can be thermo-molded, punched and grinded.

CAS

CUSTOM ADAPTIVE SHAPE

C.A.S SHELL

The C.A.S shell has an anatomical shape that matches the foot shape. This allows for a better out-of-the-box fit. The dimples on the shell reduce surface tension and facilitate the thermo customization process, making boot fitters' life easier. The shell materials allow better and longer retainment of the customized shape.

TECNICA

WINTER BOOTS

TECNICA ARGOS

ARGOS IS A NEW CONCEPT OF AFTER SKI BOOT WITH A UNIQUE MODERN LOOK, TARGETING FOR THE FIRST TIME YOUNG, PROGRESSIVE SKIERS OFFERING WARMTH, PROTECTION AND A NEW EASY STEP IN FUNCTION. JUST PERFECT AFTER A LONG SKI DAY.

- EASY STEP-IN
- WARMTH
- SNOW PROTECTION AND GRIP ON SNOWY TERRAIN

TECHNICAL FEATURES

FAST AND EASY ENTRY CUFF DESIGN

Stepping in a warm and comfortable boot after a long ski day is a dream for all skiers. The unique cuff design allows for a fast and easy step in even with wet socks.

DUAL LACING SYSTEM QUICK LACE

Fast mode: lace operates only until the instep for a super fast lacing while the elastic net keeps the tongue in place and allows you to walk even with open collar.

Full mode: the lace can operate also on the collar hooks to have a precise fit and protection for winter hiking and snow shoeing.

WARMTH GORE-TEX® INSULATED WITH FLEECE LINING

The unique GORE-TEX® insulated lining with fleece provides water and snow protection, instant warmth and high level of insulation even with wet socks. Comfortable up to -20° c / -4° F

TECHNICAL FEATURES

SNOW PROTECTION

HYDROPHOBIC UPPER MATERIAL

Full synthetic hydrophobic upper materials provides durability and high level of water/snow resistance.

- Easy to clean and wash
- TPU lamination for durability on the toe area

GRIP ON SNOWY TERRAIN

OUTSOLE

Unique design, for extreme traction on snow and mud with Tecnigrip winter compound which is durable and grippy.
